Populus simonii 'Fastigiata'

Common Name: *'Upright Simon Poplar/ Chinese Poplar'*

Landscape value:

An ideal and popular choice for deciduous screening, streetscapes and avenue planting.

Its leaf is an attractive aspect of the tree, with its glossy green leaves that have a pale silvery/white underneath.

Trunk develops to a lovely white when older.

Typical size: 15m x 3m

Growth rate: Fast

Habit: Narrow tall tree with pendulous branches. Does not sucker

Foliage: Glossy green leaves with pale silvery/white underside. In the autumn they turn a brilliant yellow.

Flowers: Catkins in spring

Fruit: Inconspicuous

Position: Full sun

Season of Interest: Autumn

Soil Type: Prefers a well-drained humus rich soil but will tolerate light to heavy soils

Tolerances/cultivation: A hardy tolerant tree. Needs good moisture in the summer. Tolerable of strong winds.
