Tour participants: Alejandro Solano-Ugalde (leader), Moses (guide, Muyuna Lodge) and Baldonero (principal driver) with five Naturetrek clients

## Day 1

Friday 14th October

The tour started with flights from the UK to Peru.

## Day 2

Saturday 15th October

Today we had a short flight from Lima to the city of Iquitos (Loreto Region), a bustling port city that is not connected by road to the main part of Peru, and which overlooks a tributary to the Amazon. Having been kitted out with rubber boots, we set off in a speedboat for a three hour trip up the mighty Amazon River to the impressive Muyuna Lodge, sighting some Grey River Dolphins on the way as well as some water-edge birds. As we left the main river, we transferred to a smaller boat for the final part of the journey, and became familiar with Black-collared Hawk, Yellow-headed Caracara and Spotted Sandpiper.

Muyuna Lodge is located in a pristine area of seasonally-flooded forest, or Varzea. As such, it is surrounded by a wealth of waterways, lakes and islands and extensive forest. We were met by our knowledgeable and enthusiastic guide, Moses. Following lunch, we had a walk in the forest which gave us Blue-headed Parrot, Squirrel Cuckoo, Olivaceous Woodcreeper, our first Antbird, the Northern Chestnut-tailed, and an excellent Scarlet-crowned Barbet. Glimpses of Wire-tailed Manakin were frustrating for some but Black-fronted Nunbird was more obliging and quite common in the hotel grounds. We also began our list of the colourful South American tanagers with probably the most common on our trip: Palm. A Pink-footed Tarantula was also spotted at the base of a tree. After a delicious evening meal, we completed our first checklist and then retired early to bed full of anticipation of a day in the Amazon Rainforest.

Pink-footed Tarantula

## Day 3

Sunday 16th October

Black-tailed Antbird

After a night experiencing the amazing sounds of the rainforest, we rose early for a morning boat trip, followed by another in the afternoon, along with further forest walks. Having caught sight of our first Horned Screamers, Three-toed Sloth and several Hoatzins, we started our Hummingbird list with six species including Blue-tailed and Glittering-throated Emeralds. White-eared and Bluish-fronted Jacamars were also seen as well as Black-tailed Antbird and three more species of Woodcreeper: Long-billed, Straight-billed and Buff-throated. Many parrots, parrotlets and parakeets flew overhead including the scarce Festive Parrot. Several flycatchers were also seen including the delightful Spotted Tody. Birds of prey included Great Black Hawk, Plumbeous Kite, Black Caracara and a

superb Laughing Falcon. We also located our first *Tangara* Tanager, the aptly named Paradise Tanager – such a dazzling array of colours! An evening boat trip gave us Spectacled Owl, many Boat-billed Herons, American Pygmy Kingfisher almost within touching distance, and a fascinating Great Potoo in it's usual 'you can't see me' pose.

## Day 4

## Monday 17th October

Sand-coloured Nighthawk

We had breakfast en route to the main Amazon River, spotting a perched Bat Falcon, Sungrebe, and Little and Striped Cuckoos along the way. We entered a wide section of the Amazon and headed for two of the numerous islands on which we saw Pied Lapwing, Dark-breasted Spinetail, Sand-coloured Nighthawk (walking!), Swallow-winged Puffbird, and Riverside and Lesser Wagtail Tyrants. As the day grew hotter we were treated to several sightings of the amazing Pink River Dolphins frolicking near the islands.

Later in the day we spent considerable time tracking down several 'skulkers' such as White-bellied Spinetail, Castelnau's and Plain-winged Antshrikes, Black-spotted Bare-eye and four species of Antbird: Ash-breasted, Black- and-White, Black-throated and White-shouldered. An Orange-fronted Plushcrown was another pleasing addition to the list. During the evening walk we enjoyed the antics of a Yellow-crowned Brush-tailed Rat hanging out of its tree hole to check that all was well. Quite an exhausting day!

## Day 5

## Tuesday 18th October

Our third morning at Muyuna Lodge began with a trip up the Yanuyacu River to try and track down the rare Wattled Curassow. We caught a glimpse of the elusive Capybara on the way. Dense water weed necessitated Moses having to chop a way through until it became just too thick and we had to climb out onto the bank. We walked for about half a mile along the forest edge until our target bird was spotted high in the canopy. After much straining of necks, three birds were located - two males that were seen to fly off and a female that remained long enough for all to get reasonable views – fabulous! Other birds of note included Speckled Chachalaca, Black-tailed Trogon and a Lettered Aracari. We were treated to four more Woodpeckers: Yellow-tufted, Spot-breasted, Chestnut and Cream-coloured, as well as four more Woodcreepers: White-chinned, Long-billed, Striped and Elegant.

Sunset over the River Amazon

After another enjoyable lunch, we headed back to Iquitos having thoroughly enjoyed our time in this amazing environment.

## Day 6

### Wednesday 19th October

The next morning, after a welcome early morning coffee, we departed the Victoria Hotel for the nearby Allpahuayo-Mishana Reserve. The forest here consists of thin, slow-growing trees set in a white sandy soil; a rare ecosystem known at only two or three sites across the Amazon basin. Many of the bird species are unique and we were fortunate to see the uncommon Great Jacamar alongside its smaller cousin, the Paradise Jacamar. There were three species of Ant-wren: Ancient, White-flanked and Stipple-throated, a Yellow-browed Antbird, and a Peruvian Warbling Antbird was heard. In addition, we saw White-crowned Manakin, Double-toothed Kite and a distant but impressive White-throated Toucan. A Rufous-capped Antthrush called very close but would not show itself. Several new flycatchers and tanagers were added to the list. All too soon we had to leave this excellent reserve to return to Iquitos.

After lunch, we caught a short flight to the town of Tarapoto and were met by our very amiable driver, Baldonero, who also turned out to be a superb bird-finder! Overnight was spent in the pleasant Toucan Suites Hotel.

## Day 7

### Thursday 20th October

On the road again early, we drove to the nearby dry forest within the drainage area of the important Huallaga River. We had several clear sightings of the rare, and usually difficult, Pheasant Cuckoo dashing through the trees. Also seen were the Huallaga Slaty Antshrike (a subspecies of Northern), Stripe-chested and White-flanked Antwrens and a White-browed Antbird. Other notable birds here were White-bellied Pygmy Tyrant, an obliging Sulphur-bellied Tyrant-manakin, and several more flycatchers. A Zone-tailed Hawk and several Blue-winged Parrotlets were also sighted as we drove back down the access road, before coming across over 150 Comb Ducks sat on a sandbank in the river. We then visited Upaquia Creek, a narrow gorge which is visible from the footpath on the side of a road bridge. Looking down, we had excellent views of strange Oilbirds as they flew around in the gloom, calling. Another rarity was White-tipped Swifts that soared above us. It wasn't the easiest of places to bird, but the birds on view were awesome!

Golden-tailed Sapphire

On returning to Tarapoto, we had a lovely lunch in an upstairs restaurant from which we had excellent views of Swallowtail Kites wheeling round the rooftops. We later drove to the orchid city of Moyobamba and stayed at Wakanki Lodge, a family-run eco-reserve. The owner had constructed a birdwatching tower, and erected feeders in a garden full of flowering plants. These attracted several new species including a stunning Golden-tailed Sapphire and the delightful Rufous-crested Coquette – what a bird! It was no surprise that this charismatic tiny bird turned out to be bird-of-the-trip!

## Day 8

Friday 21st October

The next morning we climbed the ridge behind the Lodge into an area of open forest. Species seen included: Blue-crowned Trogon, Rufous Motmot, Gilded Barbet, Lafresnaye's Piculet, Rufous-fronted Thornbird, Fiery-capped Manakin, Wing-barréd Piprites and a pair of Golden-collared Toucanet that showed well in a nearby tree. After a pleasant lunch at a nearby restaurant, we embarked on a three hour drive towards Owlet Lodge, one of the most eagerly awaited stops on the trip. Driving up the eastern Andean slopes, we stopped to watch a Royal Sunangel feeding on orange flowers close by the roadside and saw three more colourful *Tangara* Tanagers: Saffron-crowned, Flame-faced and Beryl-spangled.

We arrived at the Lodge on the Abra Patricia ridge at dusk and were told it was the best time to try for the Long-whiskered Owlet. It meant climbing down a tricky path for about a mile and a half armed with torches and with the help of the local guide. A pair of White-capped Tanagers was spotted in the top of a nearby palm. Once in the correct location, we tried to tempt the Owlet to show itself. Initial signs were good as almost immediately an individual called. It clearly came much closer, but a further 30 minutes or so later we still had not seen it and it was decided we should return to the Lodge.

The peaceful lodge at Wakanki

## Day 9

Saturday 22nd October

Owlet Lodge is in a beautiful location amongst an extensive tract of cloud species on the eastern slope of the Andes at an altitude of about 2300 metres. The forest here is rich in bird and other wildlife. In the morning, we birded in the grounds of the eco-Lodge and also from the road, but a persistent drizzle kept the birds down.

The Cloud Forest of Abra Patricia

However, we did record: Masked Trogon, Streaked Tuftedcheek, Crimson-mantled Woodpecker, Streak-headed Antbird, a pair of Rusty-tinged Antpittas which constantly called as they moved around their territory, and our first White-collared Jays. Several more Tanagers were added to the list including: Grass Green, Rufous-chested, Spotted and Silver-backed. In addition, the feeders attracted a range of Hummingbirds including the amazing sword-billed, and there were a few warblers moving around in the smaller trees and bushes. Several 'good' birds were heard but did not materialise: Mitred Parakeet,

White-throated Screech-Owl, Rufous-bellied Nighthawk, Andean Solitaire and Large-footed Tapaculo. A friendly Tayra was regularly seen around the feeders near to the dining room and in the evening the lights attracted a mind-boggling variety of moths and other insects.

## Day 10

Sunday 23rd October

It was well and truly dark when two of the group set off at 3.30am with Alejandro for one more attempt to find the Whiskered Owlet. Again, no luck, but there were sightings of night monkeys, and two Rufous-banded Owls called very close. On leaving the Lodge, we drove through the Aguas Verdes forest region towards a new private reserve with hummingbird feeders and trails situated in ridge-top Elfin forest. A male Cock-of-the Rock stood out amongst the trees! The feeders attracted a variety of hummingbirds, key of which was the Ecuadorian Piedtail, briefly taking a sip before retreating to the safety of the trees. Walking along the trail we saw Red-billed Parrot, Chestnut-collared Swift, Speckle-chested Piculet, Versicoloured Barbet, Yellow-breasted Antwren, Marble-faced Bristle Tyrant and an attractive Ornate Flycatcher working the branches of the canopy. A White-crowned Tapaculo called frequently from near the trail but we were unable to get a sighting of this extremely tricky species. We then moved to a bridge spanning a fast-flowing section of river, unusual given that it was very dry, where we were treated to the sight of a pair of Torrent Ducks and two White-capped Dippers (probably the last chance to see both of these species).

Having had a very successful morning, we set off for one the most anticipated sites on the tour - the hummingbird reserve at Huembo, where we were able to sit and watch both male and female Marvellous Spatuletails, along with several other species, flitting between the feeders. We spent about 90 minutes entranced by their behaviour and beautiful, unique plumage. They certainly live up to their name!

Our final destination that day was another pleasant hotel at Puerto Pumas, close to Lake Pomacochas. Sufficient daylight allowed us to approach the edge of the lake along a boardwalk. We arrived during a festival so it was busy and noisy. However this didn't seem to bother the birds and we saw Puna Snipe in an area of wet meadow, Plumbeous Rail which seemed to chorus with the local disco music, Peruvian Meadowlark and a flock of Yellow-bellied Seedeaters.

A male Marvellous Spatuletail

## Day 11

Monday 24th October

Ruins of circular buildings at Kuelap Hillfort

After some quick birding around the hotel where we picked up Golden-bellied Grosbeak, Andean Lapwing, Rufous-capped Antshrike, Tufted Tit-tyrant and our first Peruvian Pigeons, we set off for the Utcubamba River valley. The birds here are increasingly regarded as Marañon specialties and the day, which had started cool and overcast, became hotter as the terrain became drier. Several stops were made in the valley for Marañon Streaked Saltator, Marañon Thrush and Marañon Wren, as well as Inca Jay. A few more tanagers and hummingbirds were seen including a Little Woodstar which looked more

like a bumblebee as it flew around the tops of the trees. At a particularly dry area we located two new

Woodpeckers: Lineated and Black-necked, the latter tormenting us for some time before we managed to pin it down. It was here that we saw our first American Kestrel. Other birds in this location were Mitred Parakeets at a petrol station, and several Fasciated Tiger Herons along the river.

We then had a 36 kilometre uphill drive along a twisty mountain, mostly gravel, road to the ancient archaeological site of Kuelap, built by the Chachapoya people in the 16th century. We had a packed lunch at the site, and then proceeded up to the fortress with a guide where we learned a lot about the hill fort and its people. There were birds to be seen here, and on the road out too, including Scarlet-fronted Parakeet, Red-crested Cotinga, Banded Fruiteater, Hooded Siskin and the lovely Rainbow Starfrontlet – sadly we were only able to see its back. It was well worth the trip up to the ruins but a rain shower made descending the polished

The delightful Homestead of El Chillo

stone steps very tricky and the journeys along the mountain road were quite tiring. However, in future years, a new cablecar should be operating and this will cut the journey time down considerably. We finally arrived in the valley bottom at a delightful family-run homestead called 'El Chillo'. This is a converted farm house with large comfortable rooms and the meals prepared and served by the owners - a very pleasant place to stay.

## Day 12

While birding in the grounds of El Chillo, our driver, Baldonero, found a pair of Koepcke's Screech-Owls roosting in one of the trees. En route to the next destination, we found Pearl Kite, Pacific Pygmy Owl, Harris Hawk, Fasciated Wren and Little Inca Finch. We had another long drive along the Utcubamba River to reach a large town called Jaen and the comfortable hotel El Bosque. The swimming pool here was most welcome as the temperature had risen considerably! After lunch, and once the temperature had eased, we made a short sortie into the hills behind the hotel. The area was wooded with open areas of pasture. We had great views of the main target bird here, the striking Marañon Crescentchest – quite a skulker but well worth the effort! Also on view were Blue Ground Dove, Marañon Spinetail, our first Groove-billed Anis, Spot-throated Hummingbird, Long-billed Starthroat, Great Antshrike and the Marañon race of the Northern Slaty Antshrike. We also saw our first Vermillion Flycatcher, a bird that never fails to appeal, and Long-tailed Mockingbird. After a superb couple of hours birding, we returned to the hotel where the food was good and choices could be made from the menu.

## Tuesday 25th October

Roosting Koepcke's Screech-Owls

## Day 13

Wednesday 26th October

Tumbesian breakfast with a view

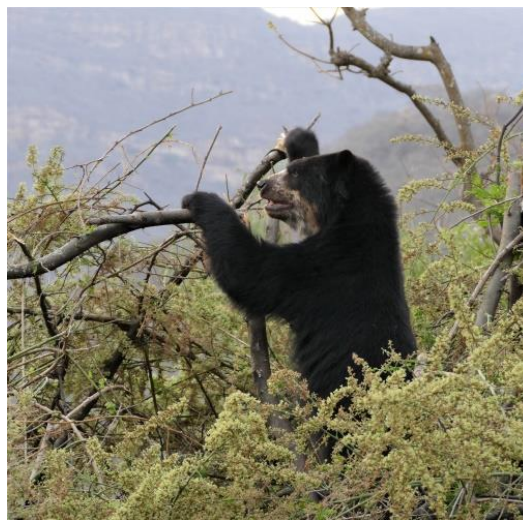

We agreed to depart the hotel at 4am in order to cross the Andes and bird in the Tumbesian region on the western slopes as early as possible. A delicious al fresco breakfast was provided before we explored the dry slopes, finding Chicungo, Andean Slaty Thrush, Tumbesian Tyrannulet, Black-cowled Saltator, Green-tailed Trainbearer, Chapman's Antshrike, Ash-breasted Sierra Finch, Rusty Flowerpiercer, several difficult Ecuadorean Piculets and Bay-crowned and White-winged Brush Finches. We were treated to the wonderful spectacle of an adult Andean Condor gliding overhead against the blue sky!

Heading towards the town of Tucume on the coastal plain, we stopped in a dune area and saw Golden-olive Woodpecker, Tumbesian and Barn Swallows and Variable Hawk. In the distance we could hear our first Peruvian Thick-knees. Lunch was taken at a pleasant restaurant in the city of Lambayeque, renowned for its wonderful Lord of Sipan museum. Here we learned about the culture of the pre-Incan Mochica people who built adobe pyramids to house their dead, in a similar style to the Egyptians. From there we arrived at Los Horcones, a country club-style hotel in Tucume, next to several of the heavily-eroded adobe pyramids. We had time before dusk to explore the surrounding mesquite forest, adding Scarlet-backed Woodpecker, White-tailed Jay, Baird's Flycatcher and Burrowing Owl to our list.

## Day 14

Thursday 27th October

We departed for the nearby Pomac archaeological sanctuary and managed to find the endangered Peruvian Plantcutter perched in the open; a Necklaced Spinetail was also seen. We then drove a fair distance through semi-desert, stopping to find Red-backed Hawk, Pacific Parrotlet and Coastal Miner. A stretch of smooth tarmac was an all too short treat as we soon turned onto a long rough road that took us, finally, to the wonderful eco-lodge at Chaparri. Here we would spend two comfortable nights in adobe cabins hidden away inside the reserve. We soon spotted a pair of endangered White-winged Guans perched nearby, from a reintroduction programme taking place in the sanctuary. After an excellent lunch, we saw Collared Antshrike, Superciliated Wren regularly singing its loud, happy song, Streak-headed Woodcreeper, Cinereous and Collared-warbling Finches and White-headed and Sulphur-throated Brush Finches. There are also pens at Chaparri holding Spectacled Bears, some in preparation for returning to the wild. It was a marvellous experience to observe them at close quarters. True wild bears exist in Chaparri also but we were not lucky enough to see one. We did, however, see several Sechuran Foxes, which were almost tame as they hunted for scraps around the Lodge. Not so when they were stalking the Long-tailed Mockingbirds that were roosting low down in the bushes!

Spectacled Bear being prepared for release

## Day 15

## Friday 28th October

A confiding Elegant Crescentchest

Whilst still dark, we drove to Casupe, a mountainous region inside the reserve, spotting a Peruvian Thick-knee and Scrub Nightjars on the way. We had breakfast by a small shrine and birded on the dry western Andean slopes. New birds included Red-masked Parakeet, a flyby pair of Ochre-bellied Dove, White-collared Swift, Plumbeous-backed Thrush, Grey-and-Gold Warbler, Pacific Elaenia, Tumbes Pewee, Black-capped Sparrow and a gorgeous Ecuadorian Trogon perched quietly in the trees just above our breakfast spot. A family of four King Vultures was seen wheeling around in the valley. In the afternoon, back at the Lodge, we finally got to see the Elegant Crescentchest which was very obliging for the photographers. Many flycatchers, antshrikes and other small birds were seen during the day, mostly coming to drink at the small water hole by the Lodge. At dusk, a West Peruvian Screech Owl was located in a nearby tree, typically well-camouflaged!

## Day 16

## Saturday 29th October

Before breakfast, we walked a short distance to observe hummingbirds drinking and bathing in the nearby creek. Several more varieties were added to those already seen at Chaparri, including the endemic Tumbes Hummingbird. After breakfast it was, sadly, time to leave, but not before adding Sulphur-throated Finch and Parrot-billed Seedeater to our increasingly impressive list. Chaparri is a wonderful place where dedicated biologists are doing important work on reintroducing rare species back to the wild – we wish them well.

Rustic eco- accommodation at Shaparri

We set off for the Tinajones Reservoir, which was particularly low after the long dry period. There were a large variety of waterbirds here, including Black-faced and Puna Ibis, Pied-billed and Great Grebes plus Osprey and Northern Crested Caracara. We also made another short stop for Chestnut-collared Swallow which appeared to be nesting under the road bridge. We continued towards the coastal plain and an excellent seafood lunch at Pimintella. Afterwards, we stopped briefly by the harbour where we saw our first gulls, two Magnificent Frigatebirds, several Blue-footed Boobies and Peruvian Pelicans. We then visited Santa Rosa for Killdeer and three Tawny-throated Dotterels, and Puerto Elen for Wren-like Rushbird, Black-lored (Masked) Yellowthroat and the smart Many-coloured Rush Tyrant. There was also a collection of waders by a small marshy area, including Lesser Yellowlegs and Least, Western and Semipalmated Sandpipers. We spent the night in the very comfortable Hotel Grand Chiclayo in the city where several weddings were in progress.

## Day 17

## Sunday 30th October

On our final day of the trip, we departed from Chiclayo airport for Lima. Here, we were able to indulge in a spot of sea-watching, which gave us, among others, Peruvian Booby, Guanay and Red-legged Cormorants, Royal Tern and a couple of Humboldt Penguins. Afterwards, we drove to a small pool on a private estate and 'collected' some more water birds, including Purple Gallinule, a flock of Black Skimmers, many Little Blue Herons and several gull species including Band-tailed and Franklin's. We were treated to a wonderful 'end of tour' seafood lunch overlooking the sea where we could watch lovely Inca Terns coming and going. All too soon it was time to leave for the airport and our homeward flights.

The 2016 Naturetrek Northern Peru Group enjoying their 'end-of-tour' lunch

## Summary

The 15 days we spent in Northern Peru were wonderful - tiring and challenging at times but, overall, extremely enjoyable. We identified a total of 603 bird species (of which 44 were heard only), a fantastic total that was primarily due to the highly skilled guides that led us, in particular Alejandro, who hardly missed a sound or glimpse of movement. It wasn't just about birds though; we saw lots of butterflies, mammals and other creatures, many beautiful flowers, stayed in some amazing locations, dined on some excellent food, experienced something of the fascinating culture and history of this part of Peru and met some interesting and friendly people.

## Top 10 birds of the Trip

(as voted by the tour members)

1. Rufous-crested Coquette
2. Marvellous Spatuletail
3. Oilbird
4. Pheasant Cuckoo
5. Peruvian Plantcutter
6. Elegant Crescentchest
7. Marañon Crescentchest
8. Koepcke's Screech-owl
9. Andean Condor
10. Andean Cock-of-the-Rock

The charismatic Rufous-crested Coquette

The top mammal sighting was almost unanimously the Pink River Dolphin.

## Sub-species seen (counted only as nominate sub-species above)

1	Marañon (Northern) Slaty-Antshrike	<i>Thamnophilus punctatus leucogaster</i>											✓					
2	Huallaga (Northern) Slaty-Antshrike	<i>Thamnophilus punctatus huallagae</i>						✓										
3	Tumbes (Southern) Beardless-Tyrannulet	<i>Camptostoma obsoletum sclateri</i>										✓	✓	✓	✓	✓		
4	West Amazonian (Southern) Beardless-Tyrannulet	<i>Camptostoma obsoletum olivaceum</i>		✓		✓		✓										
5	White-faced (Tropical) Gnatcatcher	<i>Polioptila plumbea. bilineata</i>											✓	✓	✓	✓		
6	Marañon (Tropical) Gnatcatcher	<i>Polioptila plumbea maior</i>											✓					

Of the 607 species recorded, 44 were only heard

## Mammals

Pink River Dolphin  
Pygmy Marmoset  
Peruvian Night Monkey  
Montane Bamboo Rat  
Greater Bulldog Bat  
Spectacled Bear  
South American Sea Lion

Grey Dolphin  
Saddleback Tamarin  
Venezuelan Red Howler  
Yellow-crowned Brush-tailed Rat  
(Sheba's) Short-tailed Bat  
Kinkajou  
Collared Pecary

Brown-throated three-toed Sloth  
Common (Bolivian) Squirrel Monkey  
Capybara  
Guayaquil Squirrel  
Sechuran Fox  
Tayra  
White-tailed Deer

## Other Taxa

Green Iguana  
Marsupial Frog  
Smoky Jungle Frog

(Sechura?) Lizard  
Reticulated Poison Dart Frog  
Pink-footed Tarantula

(Red-footed?) Tortoise  
Hyla Tree Frog
